

Post Jig Applicator

Description

This crimping applicator is designed for processing belted or loose terminals for big cross sections.

The wire and insulation crimp heights are set, independently of each other, by means of adjustable wedges. This applicator can also be added with bending functionalities to modify the geometry of terminals.

Range of Application

Schaefer crimping applicators are used in the series production of the cable processing industry.

Examples of use

Battery terminals with cross sections from 16 mm² to 100 mm².

Product Combination Possibilities

Tool type 590.100 for use in EPS 6000, tool type 690.100 for use in EPS 10000.
